Designing a Better World by SOM

We are leading the change
in smarter cosmetic solutions for
a better world with SOM.

Cotton flowers, devoid of fragrance and worldly splendor,
serve the world with pure devotion.

They symbolize a mother's boundless love, and 'SOM' will simply
remain as 'SOM, Spirit of Mom.' We aspire to design the world and
contribute to society with SOM.

We are driven by the Spirit of Mom to design a better world. This means using our creativity and expertise to bring positive change to people's lives, just like a mom who strives to create a safe, nurturing, and happy environment for her children. Whether we're designing our products, machinery, or technology, we always keep our mission in mind and work with passion, empathy, and dedication to make a real difference in the world.

“

Starting with trust, nurturing respect
and care, love blossoms over time.
Sharing is love, the core of
TEXKOR's philosophy.

TEXKOR

Our vision is to become the world's leading solution provider for absorbent cotton products, developing and manufacturing various machines for hygiene and cosmetic cotton products, as well as producing a wide range of cotton products using our proprietary machines. Inspired by the philosophy of prioritizing the well-being of the people by Master Moon Ik-Jeom, a respected figure in the Late Goryeo Era, we strive to grow into a global company in the machinery and finished product industries related to cotton, with a sense of pride in being the world's only center of the absorbent cotton industry.

信

Trust

We value trust in all our relationships and interactions, including with our customers, employees, partners, and stakeholders. We believe that trust is essential for building strong and lasting relationships and for achieving our goals.

Righteousness
義

In a rapidly changing society, it can be easy to lose sight of our moral values and principles. We must be mindful that succumbing to ethical decay could jeopardize the trust we have built up over time. To correct this, we must reflect on ourselves and put justice into practice. We believe that a humble and sincere attitude, admitting our own shortcomings and striving to do better, is the foundation of righteousness. As the saying goes, "what is right must be done right." This is why we believe that having a "heart of honesty" is the starting point of righteousness, as it is the key to success.

We strive to approach every interaction with humility and
an open mind, recognizing that
mutual respect and understanding are the
foundation of healthy relationships.

禮
Respect

At our company, we value proper conduct and respect for others in all our interactions. Following appropriate social norms and etiquette helps create a positive, harmonious environment that fosters productivity and creativity. By upholding these principles, we can work towards our shared goals and achieve success together. Recognizing the importance of respecting others' perspectives and experiences, we believe in acknowledging and respecting differing views.

愛 Love

When we practice the values of trust, righteousness, and respect, love naturally follows. Love is about sharing, and this is the ultimate goal of TEXTOR's corporate philosophy. Love is the universe, seeking to make everything flourish. Embracing a heart full of love opens up the path to success in both life and business. If we can contribute to the growth of our society through this process, then we are truly making a positive impact. Love is about sharing and altruism. This is the true source of happiness, striving for the benefit of others and the world.

Our Company

MACHINES

Over the past 25 years, we have dedicated ourselves exclusively to the development and manufacturing of machines for absorbent cotton products. During this time, under the TEXTKOR name, we have exported over 300 machines to 30 countries. Our machines have been supplied to numerous customers, ranging from countries in Africa, the Middle East, and South America to the United States, European nations, and various Asian countries.

We have developed over 10 different machines for various products, totaling more than 40 machine models. In a relatively short time, we have achieved significant milestones and learned from our experiences. Now, we are poised for a new leap forward, building on our accumulated expertise. We will continue to work diligently to manufacture the equipment our customers need.

“

We're not a typical producer of facial cotton pads.

We meticulously select the finest raw materials and equipment to meet our customers' precise needs.

FACIAL COTTON

We are not your typical facial cotton manufacturer. While other companies process pure cotton nonwoven fabric to produce facial cotton, TEXTOR goes the extra mile. We develop and produce superior products tailored to each item's unique characteristics. This effort includes selecting the right cotton raw materials, choosing suitable pure cotton nonwoven materials, and developing production machinery to maximize customer satisfaction.

“

Cosmetic Wet Pads in Individual Sachet Packaging. This is an innovative product born from all of TEXKOR's accumulated expertise.

COSMETIC WET PADS

Our Cosmetic Wet Pads product line reflects TEXKOR's commitment, from machine development through to the final product development. We take great pride in this. Individually packaged products are convenient to carry anytime, anywhere, and are especially essential during overseas travel. Individual packaging cosmetic pads can be applied to various products, not limited to cleansing pads. We look forward to continually satisfying our customers' diverse needs with these innovative cosmetic pads.

PADS : We've selected the most eco-friendly and trouble-free cotton as the pad material. Just as the name suggests, we used fairly thick cotton nonwoven for the pads.

USER EXPERIENCE : Pads made with thick cotton provide a gentle and effective cleansing experience. With a large size of 7x9 cm, you can clean your entire face with one pad.

HYGIENE : Each pad is individually packaged for hygienic storage and use. Moreover, our product is produced without human contact using TEXKOR's proprietary fully automated production facilities.

PORTABILITY : Individually packaged products are convenient to carry anytime, anywhere, and are especially essential during overseas travel.
